I wanted to make sure that you all had a copy of the proposed DEQ approach for dealing with roads. It was developed by DEQ as part of the mid-Coast IR TMDL but objections from timber industry representation tabled the effort. As the State moves forward on addressing additional management measures for forest roads, this outline can be used as a guide for an approvable roads program. Had the State moved forward with the proposed effort outlined above it would have addressed outstanding forest roads issues. Dave

Subject: Roads Management Approach

MidCoast Project Team:

Attached is the draft Road Management Approach integration document. Reflecting stakeholder feedback, this document is intended to be an introduction to the three sector-based roads approaches (forestry, agriculture, public roads), to tie the three sector-based approaches together, and to resolve areas of ambiguity as to which sector some roads belong.

I would appreciate review and comment. I would like to have this ready for the Sediment TWG within the next 3 weeks if possible.

Thanks,
Josh
